Objective

Passionate and detail-oriented developer with a strong foundation in Java, front-end technologies, and database management. Eager to apply problem-solving skills and technical expertise to build efficient, scalable, and user-centric applications. Seeking a dynamic role to contribute to innovative projects while continuously enhancing my development skills.

Education

Vasireddy Venkatadri Institution of Technology   Jan 2021 - April 2024
Bachelors in Electrical and Electronic Engineering
CGPA: 8.08/10.0

Sri Chaitanya Junior College, Gorantla   2018 - 2020
Intermediate (10+2) Education
Percentage: 91.6%

Sri Chaitanya School   2017 - 2018
Secondary School Education (SSC)
GPA: 9.7/10

Experience

Full Stack Java Developer Trainee, Codegnan IT Solutions   June 2024 – Present

- Developed web applications using Java, Spring, and Hibernate for scalable web services.
- Designed RESTful APIs, improving server response times by 30%.
- Implemented OAuth and JWT-based authentication for secure user sessions.
- Debugged and resolved critical application issues, enhancing system reliability.
- Integrated third-party APIs for payment processing, notifications, and analytics.

Full Stack Web Developer Trainee, Devtown   Feb 2023 – May 2023

- Spearheaded front-end development using React.js, improving user engagement.
- Integrated REST APIs to enable dynamic content updates across multiple components.
- Optimized database queries and back-end logic, reducing response time.
- Collaborated with cross-functional teams to align business needs with technical solutions.
- Documented project workflows and technical specifications to assist future development teams.

Projects

Restaurant Management System   Source Code

- Built a full-stack application to streamline restaurant operations using **Spring Boot** and **JSP**.
- Features include adding, editing, searching, and removing items with secure user authentication.
- Used **Spring Security** for role-based access and **Lombok** to reduce boilerplate code.
- Database management implemented with **MySQL** to handle all restaurant data efficiently.
- Focused on clean code, maintainability, and adherence to the MVC design pattern.

Car Rental System   Source Code

- Designed a menu-driven console application for renting, returning, and managing cars.
- Implemented robust error-handling mechanisms to ensure seamless transaction processing.
- Features include customer management, rental history tracking, and vehicle inventory updates.
- Optimized system flexibility with object-oriented programming for scalability and maintainability.
- Planned future enhancements such as loyalty programs and premium car rental tiers.

Dragon Run Game   Source Code

- Developed a browser-based game using **HTML**, **CSS**, and **JavaScript**.
- Created a scoring system and collision detection to track player progress.
- Integrated sound effects and smooth animations for an engaging user experience.

- Applied object-oriented programming to handle game objects and interactions.
- Optimized performance for consistent gameplay across devices and resolutions.

Skills

- **Languages:** Java, HTML CSS, JavaScript, SQL, JSP, Servlets.
- **Frameworks:** Spring Boot, Hibernate, React.js.
- **Tools:** VS Code, Git, GitHub, Eclipse, MySQL Workbench.
- **Soft Skills:** Problem-solving, Time management, Collaboration, Attention to Detail.

Certifications / Awards

- Full Stack Java Development, Codegnan
- Full Stack Web Development, Devtown
- Java and CSS Basics, HackerRank
- 5-star in Java problem solving, HackerRank.
- Been in Top 20 learners, Devtown.
